Origins of Life and Evolution of Biospheres

CONTENTS OF VOLUME 37 (2007)

Volume 37 · Number 1 · February 2007

EDITORIAL NOTE

Astrobiology and Earth's Geological Record
A.W. Schwartz **1**

PREBIOTIC CHEMISTRY

Selectivity of Montmorillonite Catalyzed Prebiotic Reactions of D, L-nucleotides
P.C. Joshi · S. Pitsch · J.P. Ferris **3**

Phosphate Sorption and Desorption on Pyrite in Primitive Aqueous Scenarios: Relevance of Acidic → Alkaline Transitions
F. De Souza-Barros · R. Braz-Levigard · Y. Ching-San Jr. · M.M.B. Monte · J.A.P. Bonapace · V. Montezano · A. Vieyra **27**

Condensation of Amino Acids to Form Peptides in Aqueous Solution Induced by the Oxidation of Sulfur(iv): An Oxidative Model for Prebiotic Peptide Formation
F. Chen · D. Yang **47**

Enantiomeric Enrichment on the Prebiotic Earth
S.I. Goldberg **55**

The Viability of a Nonenzymatic Reductive Citric Acid Cycle – Kinetics and Thermochemistry
D.S. Ross **61**

MEMBRANES

Mineral Surface Directed Membrane Assembly
M.M. Hanczyc · S.S. Mansy · J.W. Szostak **67**

ORIGINS OF THE GENETIC CODE

Structure of the Genetic Code Suggested by the Hydropathy Correlation Between Anticodons and Amino Acid Residues
S. Torres De Farias · C.H.C. Moreira · R.C. Guimarães **83**

Volume 37 · Number 2 · April 2007

PREBIOTIC CHEMISTRY

The Sugar Model: Autocatalytic Activity of the Triose–Ammonia Reaction
A.L. Weber **105**

Phosphate Solubility and the Cyanate-Mediated Synthesis of Pyrophosphate
W.J. Hagan Jr. · A. Parker · A. Steuerwald · M. Hathaway **113**

Prebiotic Microreactors: A Synthesis of Purines and Dihydroxy Compounds in Aqueous Aerosol
M. Ruiz-Bermejo · C. Menor-Salván · S. Osuna-Esteban · S. Veintemillas-Verdaguer **123**

Hydrothermal Reactions of Pyruvic Acid: Synthesis, Selection, and Self-Assembly of Amphiphilic Molecules
R.M. Hazen · D.W. Deamer **143**

Kinetic Analysis of Oligo(C) Formation from the 5′-Monophosphorimidazolide of Cytidine with Pb(II) Ion Catalyst at 10–75°C
K. Kawamura · J. Maeda **153**

HYPOTHESIS

A Possible Path to the RNA World: Enantioselective and Diastereoselective Purification of Ribose
R. Bielski · M. Tencer **167**

ASTROBIOLOGY

Microbial Community of a Hydrothermal Mud Vent Underneath the Deep-Sea Anoxic Brine Lake Urania (Eastern Mediterranean)
M.M. Yakimov · L. Giuliano, S. Cappello, R. Denaro · P.N. Golyshin **177**

Survival of Methanogenic Archaea from Siberian Permafrost under Simulated Martian Thermal Conditions
D. Morozova · D. Möhlmann · D. Wagner **189**

BOOK REVIEWS

"Origins of Life. Biblical and Evolutionary Models Face Off" by Fazale Rana and Hugh Ross. NavPress Books, Colorado Springs CO, 2004. 231 pages of main text. List price $19.99 ($12.99 at Amazon.com)
D. Deamer **201**

Robert M. Hazen: Genesis: The Scientific Quest for Life's Origin. Joseph Henry Press, 2005, 339 pp. ISBN: 0309094321, $25.16 (PDF edition available)
P. Bahn **205**

Life as We Do Not Know It: The NASA Search for (and Synthesis of) Alien Life. Peter Ward, Viking Press, 2005, 292 pp. ISBN 9780670034581 $25.95 ($16.35 from Amazon)
P. Bahn **207**

Book Review: Conditions for the Emergence of Life on the Early Earth, Sydney Leach, Ian Smith, and Charles Cockell, (editors), Philosophical Transactions of the Royal Society B 2006, vol. 361, no. 1474, pp. 1673–1894, ISSN 0962-8436
P. Bahn **209**

Recent Cambridge Books on Evolutionary Biology
A.W. Schwartz **213**

Volume 37 · Number 3 · June 2007

PREBIOTIC CHEMISTRY

Pressure Effects on the Abiotic Polymerization of Glycine
S. Ohara · T. Kakegawa · H. Nakazawa **215**

Interaction of Ribonucleotides with Metal Hexacyanocobaltate(III): A Possible Role in Chemical Evolution
S.R. Ali · Kamaluddin **225**

CHIRALITY

Asymmetric Spatiotemporal Evolution of Prebiotic Homochirality
M. Gleiser **235**

The Role of Supernova Neutrinos on Molecular Homochirality
P. Bargueño · R. Pérez de Tudela **253**

A Relativistic Neutron Fireball from a Supernova Explosion as a Possible Source of Chiral Influence
G.A. Gusev · T. Saito · V.A. Tsarev · A.V. Uryson **259**

MEMBRANES

The Influence of Environmental Conditions, Lipid Composition, and Phase Behavior on the Origin of Cell Membranes
J.A. Thomas · F.R. Rana **267**

ASTROBIOLOGY

Thermal Diapirism and the Habitability of the Icy Shell of Europa
J. Ruiz · L. Montoya · V. López · R. Amils **287**

BOOK REVIEW

The Planets
P. Bahn **297**

Volume 37 · Numbers 4–5 · October 2007

International School of Complexity – Basic Questions about the Origins of Life
Guest Editors: Pasquale Stano · Pier Luigi Luisi

Special Issue: *Nine Basic Questions on the Origins of Life*, International School of Complexity, Erice (Italy), 1 to 6 October 2006.
A.W. Schwartz **301**

Basic Questions About the Origins of Life: Proceedings of the Erice International School of Complexity (Fourth Course)
P. Stano · P.L. Luisi **303**

QUESTION 1: LOW MOLECULAR WEIGHT COMPOUNDS, AND CONTINGENCY VS. DETERMINISM

Question 1: Commentary Referring to the Statement "The Origin of Life can be Traced Back to the Origin of Kinetic Control" and the Question "Do You Agree with this Statement; and How Would You Envisage the Prebiotic Evolutionary Bridge Between Thermodynamic and Kinetic Control?" Stated in Section 1.1.
A. Eschenmoser **309**

Question 1: Origin of Life and the Living State
S. Kauffman **315**

Question 1: Peptide Nucleic Acids and the Origin and Homochirality of Life
P.E. Nielsen **323**

Question 1: The FeS/H_2S System as a Possible Primordial Source of Redox Energy
M. Dörr · T. Alpermann · W. Weigand **329**

QUESTION 2: ASTROBIOLOGY

Question 2: Raman Spectroscopic Approach to Analytical Astrobiology: The Detection of Key Biomolecular Markers in the Search for Life
H.G.M. Edwards **335**

Question 2: Why Astrobiology?
S. Pizzarello **341**

Question 2: Why an Astrobiological Study of Titan Will Help Us Understand the Origin of Life?
F. Raulin **345**

Question 2: Relation of Panspermia-Hypothesis to Astrobiology
Z.P. Zagorski **351**

QUESTION 3: MACROMOLECULAR SEQUENCES

Question 3: The Worlds of the Prebiotic and Never Born Proteins
C. Chiarabelli · D. De Lucrezia **357**

Question 3: The Problem of Macromolecular Sequences: The Forgotten Stumbling Block
P.L. Luisi **363**

QUESTION 4: CHIRALITY

Question 4: Short Remarks About the Origin of Homochirality
V. Avetisov **367**

Question 4: Basic Questions About the Origin of Life: On Chirobiogenesis
M. Lahav **371**

QUESTION 5: RNA WORLD

Question 5: On the Chemical Reality of the RNA World
D. De Lucrezia · F. Anella · C. Chiarabelli **379**

Question 5: Does the RNA-World Still Retain its Appeal After 40 Years of Research?
P.-A. Monnard **387**

QUESTION 6: GENETIC CODE

Question 6: Early Steps of Evolution and Some Ideas About a Simplified Translational Machinery
K.H. Nierhaus **391**

Question 6: How Did Translation Occur?
P. Strazewski **399**

Question 6: Coevolution Theory of the Genetic Code: A Proven Theory
J.T.-F. Wong **403**

QUESTION 7: EARLY CELLS

Question 7: Biosynthesis of Phosphatidic Acid in Liposome Compartments – Toward the Self-Reproduction of Minimal Cells
Y. Kuruma **409**

Question 7: Comparative Genomics and Early Cell Evolution: A Cautionary Methodological Note
S. Islas · R. Hernández-Morales · A. Lazcano **415**

Question 7: Construction of a Semi-Synthetic Minimal Cell: A Model for Early Living Cells
G. Murtas **419**

Question 7: Optimized Energy Consumption for Protein Synthesis
W. Szaflarski · K.H. Nierhaus **423**

Question 7: The First Units of Life Were Not Simple Cells
V. Norris · A. Hunding · F. Kepes · D. Lancet · A. Minsky · D. Raine · R. Root-Bernstein · K. Sriram **429**

Question 7: Modelling Minimal 'Lipid-Peptide' Cells
K. Ruiz-Mirazo · F. Mavelli **433**

Question 7: New Aspects of Interactions Among Vesicles
P. Stano **439**

Question 7: The Vesicle World: The Emergence of Cellular Life can be Related to Properties Specific to Vesicles
S. Svetina **445**

QUESTION 8: THEORETICAL MODELS

Question 8: From a Set of Chemical Reactions to Reproducing Cells
K. Kaneko **449**

Question 8: Bridging the Gap Between In Silico and In Vitro Approaches to Minimal Cells
F. Mavelli · K. Ruiz-Mirazo **455**

QUESTION 9: ARTIFICIAL LIFE

Question 9: Theoretical and Artificial Construction of the Living: Redefining the Approach from an Autopoietic Point of View
L. Bich · L. Damiano **459**

Question 9: Minority Control and Genetic Takeover
K. Kaneko **465**

Question 9: Prospects for the Construction of Artificial Cells or Protocells
P.-A. Monnard · H.-J. Ziock **469**

Question 9: Quantum Self-Assembly and Photoinduced Electron Tunneling in Photosynthetic Systems of Artificial Minimal Living Cells
A. Tamulis · V. Tamulis **473**

Volume 37 · Number 6 · December 2007

EDITORIAL NOTE

Stanley Miller 1930–2007
A.W. Schwartz **477**

PREBIOTIC CHEMISTRY

Amino Acid Interaction with and Adsorption on Clays: FT-IR and Mössbauer Spectroscopy and X-ray Diffractometry Investigations
L.O.B. Benetoli · C.M.D. de Souza · K.L. da Silva · I.G. de Souza Jr · H. de Santana · A. Paesano Jr · A.C.S. da Costa · C.T.B.V. Zaia · D.A.M. Zaia **479**

Oligomerization of Thioglutamic Acid: Encapsulated Reactions and Lipid Catalysis
H.H. Zepik · S. Rajamani · M.-C. Maurel · D. Deamer **495**

The Effects of Ferrous and other Ions on the Abiotic Formation of Biomolecules using Aqueous Aerosols and Spark Discharges
M. Ruiz-Bermejo · C. Menor-Salván · S. Osuna-Esteban · S. Veintemillas-Verdaguer **507**

HYPOTHESIS

A Model for the Origin of Protein Synthesis as Coreplicational Scanning of Nascent RNA
A.V. Yakhnin **523**

Steps Towards the Formation of A Protocell: The Possible Role of Short Peptides
M. Fishkis **537**

BOOK REVIEW

Complete Course in Astrobiology. Gerda Horneck and Petra Rettberg (eds.), 413 pp. Wiley-VCH, ISBN 978-3527-40660-9
P. Bahn **555**
